A: [Intel] Centrino Advanced-N + WiMAX 6250 Wi-Fi Card From: Intel Centrino Advanced-N + WiMAX 6250 is a wireless card made by Intel based on EDGE/WiFi chipsets and it is listed under Linux-wireless project. In the past it used to be named Intel Centrino Advanced-N + WiMAX 6350 but was never officially sold by Intel so the branding is just a coincidence. It is based on iwlwifi driver and can be used along with other drivers. N: The thing is, if you do not have an official Windows driver for your wifi card, the linux driver will not work correctly. The Ralink RT3290 is a very popular wifi card. This is the second time that the same judge has been assigned to this case, and the third time that it has been docketed in the court. For the sake of clarity I have broken down the sequence of events as they have unfolded up to now. A publication ban is in place in this case and there is no doubt that stories related to this case could be of public interest, and therefore the people of Nova Scotia should have access to them. The right to access this information is very important to people, because news stories about deaths, trials and reports into serious incidents can affect people's opinions, and any one of these things could have an effect on someone's life. In this case, it is very important to understand the role of the judge in an area where he has deep experience. The death of Robert John Shepherd in the prison was reported on November 29. The case was docketed January 25. The Public Inquiries Act was invoked. On May 4, 2009, the judge issued an interim order prohibiting the reporting of any information related
